15 minutes to prepare

### Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

15 minutes

### Define your problem statement

In our society we have peoples with disabilities.The project aims to develop a system that converts the sign language into human hearing voice in the desired language to convey a message to normal people.

10 minutes

### Brainstorm

Have a each participant begin in the brainstrom space by silently brainstorming ideas and placing them into the template.

10 minutes

#### TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

### Group ideas

Have everyone move their ideas into the group sharing space within the template and have the team silently read through them.

20 minutes

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

### After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

### Quick add-ons

- A Share the mural**  
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- B Export the mural**  
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

### Keep moving forward

- Strategy blueprint**  
Define the components of a new idea or strategy.  
[Open the template](#)
- Customer experience Journey map**  
Understand customer needs, motivations, and obstacles for an experience.  
[Open the template](#)
- Strengths, weaknesses, opportunities & threats**  
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.

#### Programming Aspects

- It is an platform link .
- Create an application using python.
- Create GUI to predict results .
- It is an open and free source.

#### Datasets

- The dataset are related to healthcare
- Evaluate and training the model
- Import library and load dataset

#### Analysis

- Understand the accuracy of the data.
- Accurate codes are coded for execution

#### TIP

Add customizable tag to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

#### Recognition

- Evaluation and training the model
- Import library and load dataset
- The dataset are related to healthcare

### Importance

If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

### Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
